MIMIX® DR Quick Start

Jump-Start Your Disaster Recovery Protection

Selecting MIMIX DR is an important first step toward protecting your business. MIMIX DR provides comprehensive disaster recovery protection for your entry-level Power System running IBM i. It safeguards your critical data and applications from system failure, site failure or catastrophic event.

The next step is to get your MIMIX DR protection set up and running as quickly as possible. A Quick Start from Vision Solutions jump-starts the implementation of your MIMIX DR. Our experts assist with installation and configuration to get your system running, and Web-based instruction makes sure your staff is trained with a minimum investment of time and effort. And to ensure your solution is optimally managed and monitored, a year of daily management is included with your Quick Start.

Benefits
• Shorter implementation project cycle
• More efficient use of staff
• Customized implementation
• MIMIX DR is set up and starts protecting your business sooner

Deliverables
• Solution planning
• Installation and configuration of MIMIX DR
• MIMIX DR Runbook that outlines the high-level steps for failover and recovery of your production server
• Web-based training for two members of your staff from Vision Solutions University
• One year of MIMIX DR Silver Managed Services with Vision Solutions Managed Services by the Vision Global Services team

A MIMIX DR Quick Start service has three major components:

1. A Global Services expert from Vision Solutions reviews your requirements and objectives.

2. With your assistance, the Global Services expert installs, configures and audits MIMIX DR on your production and recovery servers.

3. Web-based training and a Runbook make sure your staff is ready to handle any situation. The skills transfer is enhanced by a live question and answer session between your IT team and the Global Services expert.
